2. Multiplication

You will need to practise multiplying up to 4 digit by 2 digit numbers. Try these then make up your own. You could use a dice to generate calculations:

326 x 13 = 5190 x 27 9212 x 82

18 18 x 3 on the first row $\frac{X}{5}$ 13 (8 x 3 = 24, regrouping the 2 for twenty, then 10 x 3 = 30 + 20 = 50)

18 0 18 x 10 on the second row. (8 x 10 = 80 and 10 x 10 = 100)

3. Division

You will need to practise dividing up to 4 digit by 2 digit numbers. Your remainders will have to be left as whole numbers, decimals or fractions. Try these then make up your own:

9216 ÷ 5 = 783 ÷ 12 =

186 ÷ 15 =

0812.125

6 1 1 2 4 6 4 9 7 . 0 0 0

7. Negative numbers 8. Rounding

Use the number line below to practise counting forwards and backwards over 0.

Can you answer the following questions?

-10 + 12 = -8 + 14 =

-8 + 14 = -1 + 8 =

-1 + 8 = -5 + 10 =

Set your own challenges.

8. Rounding numbers

Practise rounding numbers to the nearest 10, 100 or 1000. e.g.

What is 35<u>6</u> to the nearest 10? **360**

What is 1<u>8</u>9 to the nearest 100? **200.**

Look at the digit before the place value you are rounding to decide.

Rounding Numbers

5 or more, 1 let it soar. 4 or less, let it rest.

9. Practise adding and subtracting numbers including missing numbers

Remember to line them up properly first using place value.

+ 5 = 357

4. What is each digit worth?

e.g. the 9 is worth 900

The 3 is worth 3/10 or 0.3

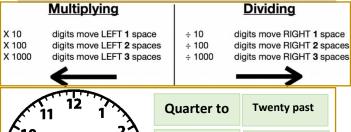

Can you identify the value of digits in other numbers?

5. Can you write a set of numbers with decimals? e.g. 36.5, 365, 36.55, 0.365, 3.655.

Order them smallest to largest.

6. Use the place value grid to multiply and divide numbers by 10, 100 and 1000.

e.g. 7,048,964.375 x 100 = 704,896,437.5 7.048.964.375 ÷ 1000 = 7048.964375

10. Practise writing the time and drawing time on the clock. Can you tell the time with an adult?

Can you answer these questions about time?

How many seconds in a minute? How many minutes in an hour? How many hours in a day?

can you do any more conversions

= 4:45pm of 24hr clock?

16: 45 | = 4:45pm

11. Squared and cubed numbers. Practise squaring and cubing numbers.

 $6^2 = 6 \times 6 = 36$ (Six squared – squaring a number means multiplying it by itself). $6^3 = 6 \times 6 \times 6 = 216$ (Six cubed – cubing a number means multiplying it by itself, then by itself again).
